

# SHUBHAM KUMAR

cloud and devops engineer

kumarshubham35568@gmail.com | 92638 84941 | vadodara, gujarat

**GitHub** | **Portfolio** | **LeetCode** | **Linkedin** | **HackerRank**

## EDUCATION

**Parul University**  
Computer Science BTech  
CGPA: 9.0/10

Vadodara, Gujarat  
June/2023 - June/2027

## EXPERIENCE

### Hacktify | Cyber Security

vadodara, gujarat | February 2025 - March 2025

Worked on hands-on cybersecurity labs during the Hacktify internship, focusing on identifying and mitigating security vulnerabilities. Gained practical experience in network security fundamentals, risk analysis, and security best practices through guided mentorship.

### YbiFoundation | Programming

vadodara, gujarat | January 2025 - February 2025

Completed a hands-on Python internship at YBI Foundation, gaining practical experience in writing, testing, and debugging Python programs while improving problem-solving and core programming skills under mentorship.

## SKILLS

|                        |                                                                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Programming Languages: | Java, Bash Scripting, Python                                                                                                                                                      |
| Libraries/Frameworks:  | Boto3, Requests, Jpa, Paramiko, Maven, PyYAML, Psutil                                                                                                                             |
| Tools / Platforms:     | AWS CLI, Terraform(HCL), Docker, Git/Github, Ansible, Kubernetes(Basics), Github Action, Cloudwatch, Nmap, Nginx, Apache, VS Code, Postman, Linux, Jenkins, AWS, Azure, GCP, Cron |
| Databases:             | MySQL, AWS RDS                                                                                                                                                                    |

## PROJECTS / OPEN-SOURCE

### Shu40 | [Link](#)

### Terraform-Static-website- | [Link](#)

HCL, HTML, CSS

### Aws\_server\_setup\_terraform | [Link](#)

HCL

### Terraform Remote State | [Link](#)

HCL

### Login Page | [Link](#)

CSS, HTML, JavaScript

### Hash-identifier | [Link](#)

JavaScript, CSS, HTML

Collaboratively developed a Hash Identifier tool using JavaScript, HTML, and CSS, where I contributed to designing the detection logic for multiple hash algorithms, building the interactive UI, and improving accuracy through pattern-based validation.

### virtualassistant | [Link](#)

JavaScript, HTML, CSS

Collaboratively developed a virtual assistant using JavaScript, HTML, and CSS, contributing to frontend development, command handling logic, and user interaction flow.

### AWS automation sacnning tool

Python

Developed an AWS Automation Tool using Python to scan the AWS platform and identify active and unused resources. The tool analyzes multiple AWS services, provides resource counts, and automates the cleanup of unused resources to optimize cost and improve cloud resource management.

### cloudSecX

HCL, Python, React

CloudSecX is a developed by a four-member team, featuring a Resume Builder, Career Analyzer, Cloud Security Scan, and Cloud Documentation to support career development and cloud security awareness.

## CERTIFICATIONS

---

- AWS certification - **Quick-Heal**
- Computer Networking - **Quick-Heal**
- Cyber Security Fundamental - **Quick-Heal**
- Java Problem Solving - **Hacker Rank**
- Security Awareness - **ISEA**
- IoT Fundamentals - **cisco networking academy**
- Python Programming - **Ybi**
